

PRIVATE EQUITY SERVICES

You want an accounting firm that can help solve business issues and provide support for the fund and its portfolio companies. We understand. In fact, a significant portion of our firm's revenue is generated from helping PE firms and their portfolio companies meet their business goals. We have driven results for portfolio companies that range from start-ups to businesses with over \$1 billion in revenue. Our clients receive valuable insight into areas where they might be carrying significant risks, a preliminary evaluation as to the quality of controls in place, and detailed recommendations to help their organization improve.

Our goal is to provide consistent and reliable accounting and financial services. We focus on eliminating communication and process hurdles and strengthening relationships with your business partners. We also routinely introduce PE firms to potential investment targets, include those that our CF mergers and acquisitions practice represent, and make strategic introductions within our network to facilitate transactions. Whether you need assistance with your firm, a specific transaction or a portfolio company, our integrated, multidisciplinary teams are ready to guide you on everything from advisory to tax, assurance to accounting, and everything in between.

ADVISORY SERVICES WE CAN OFFER:

- Buy-side representation
- Sell-side representation
- Quality of earnings and financial due diligence
- M&A transaction support
- Valuations and modeling
- IPO readiness
- Restructuring and turnaround
